

MOBILE COMMAND RETROFIT

BEFORE

Drive the maximum amount of value out of your current vehicle with a world class technology system and vehicle refresh.

EQUIPMENT REFRESH

Mobile Command and Communication vehicles are frequently characterized by heavy operational use but low mileage. Since most medium duty and heavy duty truck and trailer chassis are designed to last for hundreds of thousands of miles, many agencies can find great value in having their existing chassis refreshed. Whether you need a minor AV upgrade, a new paint job, the replacement of aging cabinets or a full tear out and systems refresh, Nomad has a proven track record in delivering value driven cutting edge solutions on used or repurposed chassis.

AFTER

COMMUNICATION UPGRADE

From VSAT bandwidth upgrades for streaming video conference calls to a complete upgrade to your RF network, Nomad will give you the best solution with future technology upgrades in mind.
