NOMAD TOTAL COMMAND (NTC)

WHEN EVERY MINUTE MATTERS

Nomad Total Command (NTC) is a comprehensive systems control and monitoring solution. NTC provides operators, fleet managers and Incident Commanders with advanced monitoring, on-board diagnostic, alerting and management tools designed and engineered specifically to improve reliability, remote operational control and maximized uptime for trailer and truck based platforms.

NTC provides step by step deployment and stowing instructions ensuring that your vehicle is ready to go at a moment's notice no matter who is deploying it.

Nomad Total Operating Picture provides operators with a comprehensive situational awareness picture and IP based control systems by creating a seamless management and integration of video surveillance, physical security, network security and access control to insure command, control, communications and management of critical systems and assets locally or remotely.
