SENTRY COMMUNICATIONS VEHICLE (SCV)

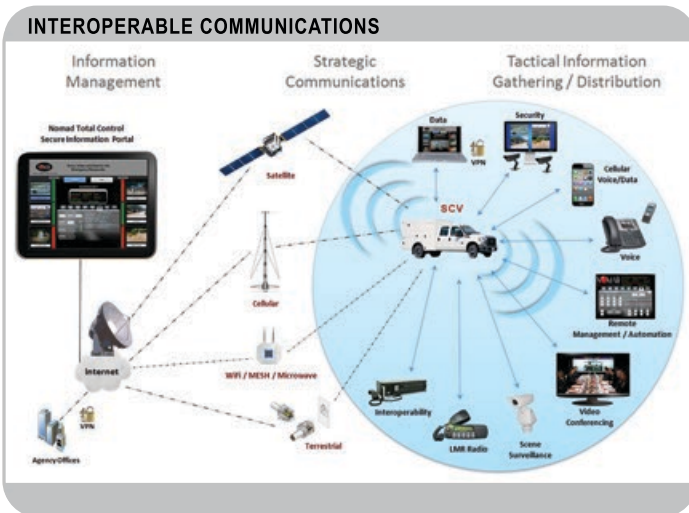

WHEN EVERY MINUTE MATTERS

The Nomad SCV communications systems are fully deployed in under 7 minutes, delivering unsurpassed scalability, versatility and adaptability to Command and Control operations.

Developed with the input of our trusted customers, team members and suppliers around the country, the NOMAD SCV was designed to overcome the inherent weaknesses in existing automobile, SUV and cargo van Command and Control vehicles.

COMPREHENSIVE COMMAND, CONTROL AND COMMUNICATIONS

- Multiple redundant secure Internet connectivity solutions (terrestrial / MESH / microwave / cellular / satellite)
- LMR support
- Integrated IP to RF interoperability Modules
- Integrated Video Surveillance Modules
- Advanced Data routing and Switching
- Cell on Demand Connectivity Solutions
- Voice, Video and Data Interoperability
- Operator Defined Custom Use Modules

NOMAD TOTAL COMMAND DRIVES EFFICIENCY AND SAFETY

Every Nomad resource is equipped with Nomad Total Command (NTC) to provide quick and easy visual monitoring of your resources' system health, allowing Incident Management tools never before available for remote management of single point or multiple deployed resources. For those on location, Nomad's exclusive Safety Wizard interfaces with NTC to provide step-by-step instructions with push-button automated deployment of all major systems, ensuring safe and consistent use of the resource, regardless of prior training. NTC, when every minute matters.
