

TENNESSEE BUREAU OF INVESTIGATION

001. // PROJECT TITLE: MOBILE CRIME UNIT

002. // THE CHALLENGE

The quality of evidence gathered at a crime scene is dependent on the forensic equipment and materials available on site. In order to process physical evidence at crime scenes faster, the Tennessee Bureau of Investigation (TBI) required a mobile crime unit that would provide:

1. Secure Storage accessible from inside and outside vehicle.
2. Exterior lighting for working outside in the dark.

The TBI Crime Scene Unit allows detectives to efficiently and securely gather evidence for large scale crimes. Designing a vehicle with extra storage space allows workers to collect and catalog an entire scene at one time. For investigations that last days or weeks, parking the mobile crime lab on site saves time by allowing workers to perform on site testing and not having to transport evidence back to a lab.

003. // THE SOLUTION

Industry: Public Safety, Crime Scene

Location: Memphis, TN

Unit: 1 Crime Scene Investigation Vehicle

OPERATIONAL USE MODULES

- One (1) Workstation
- Custom Aluminum Cabinetry
- Washroom
- Galley Radio Communications Package
- Audio/Video System
- Will-Burt Light Tower
