## MAN PORTABLE SOLUTIONS

### WHEN EVERY MINUTE MATTERS

The Nomad MPNN & MPSN were engineered from the ground up to provide a quickly deployable, man portable tools to deliver and extend video surveillance operations and MESH network coverage when traditional vehicle or trailer based solutions are impractical. With an integrated rechargeable battery pack with network health monitoring (battery levels, network health, etc), the MPNN and MPSN have typical operational times of 6-10 hours depending on operational use before battery replacement is required.

#### MAN PORTABLE DESIGN

- Multiple redundant secure Internet connectivity solutions (terrestrial / MESH / cellular)
- LMR support
- Integrated IP to RF interoperability Modules
- Integrated Video Surveillance Modules
- Advanced Data routing and Switching
- Cell on Demand Connectivity Solutions
- Voice, Video and Data Interoperability
- Stand Alone or Node Deployment Designs
- Operator Defined Custom Use Modules

#### REVOLUTIONARY PLATFORM FLEXIBILITY

System configurations are mission driven and available with man-portable tripods with heights from 4' to 24' to delivery multi-camera HD quality PTZ video surveillance tools and network extension solutions.

The MPNN & MPSN was designed to provide a cost effective, reliable and scalable component in an overall MESH network or to be used as a stand-alone resource for surveillance applications. When Every Minute Matters, the Nomad MPNN & MPSN weighs less than 50lbs and can be fully deployed in under 5 minutes.

#### EXTEND YOUR OPERATING PICTURE
