

NOMAD TOTAL COMMAND™ (NTC)

v4

- + **Simple:** Effortless one-button asset deployment
- + **Safe:** Lockouts, go/no-go notifications, and more
- + **Secure:** Admin visibility. NIST- and STIG-compliant
- + **Reliable:** Validated with a decade of field use
- + **Fast:** CMOC deployments in mere minutes
- + **Measurable:** Demonstrate efficiency and ROI

POWERFUL, INTEGRATED ASSET AUTOMATION + CONTROL

With over a decade of field-proven success, Nomad Total Command™ (NTC) is the ultimate Connected Mobile Operations Center (CMOC) management solution. Software adapted from consumer applications cannot match NTC, which is purpose-built for demanding deployments. Version 4 defines next-gen monitoring, situational awareness, machine learning, automation, and systems control. *Most importantly, NTC helps demonstrate efficiency, effectiveness, and long-term value to stakeholders, ensuring ongoing investments in critical missions.*

Effortless control. Unmatched security. Ready for action.

Get a total operating picture via a single, intuitive interface. Operate from outside the vehicle with any device for improved awareness and safety. Let NTC optimize network connections automatically, freeing critical resources. Gain insights, visibility, and accountability with detailed logging and reporting. Rest easy knowing NTC offers NIST- and STIG-compliant security. These innovations and more ensure you're ready to answer the call... When every minute matters.

Let's build something great together.

NOMAD TOTAL COMMAND™ (NTC)

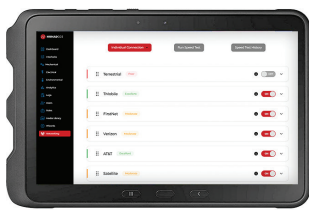

v4

Deployment Wizard

SAFE + SECURE // PROTECT PERSONNEL + DATA

A wide range of sensors with customizable alert thresholds offers total situational awareness. Operational preconditions prevent unintended and out-of-sequence deployments and user roles add another layer of safety. NTC complies with the NIST Cybersecurity Framework and meets DISA's Security Technical Information Guide (STIG) requirements. Admins have full visibility and data logging.

Intelligent Routing

SIMPLE // DEPLOY + OPERATE WITH EASE

NTC is built for simple, seamless control of CMOC systems, from power and mechanical, to connectivity and data management. Easy-to-use wizards provide step-by-step guidance on deployment, stowage, and other operational procedures and are configurable to meet your mission needs.

Logging + Analytics

RELIABLE + FAST // THE TRUSTED SOLUTION

Powerful analytics give visibility and enable real-time, data-driven decision making for better outcomes today and into the future. Field-proven since 2013, NTC evolves through continuous development and dedicated customer support.

MEASURABLE // READILY PROVE EFFECTIVENESS

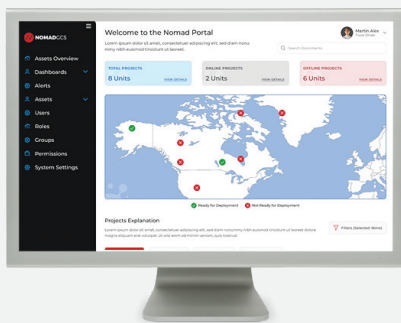

NTC helps lean teams do more with less. Its simple user interface lets anyone operate with minimal training. Automations and machine learning reduce repetitive tasks. Logging of deployments and other actions gives unmatched visibility and the ability to demonstrate utilization, efficiency, and other key metrics with ease.

WHAT'S NEW IN v4

Key Updates + Upgrades

- Customizable interface with persistent user preferences and sortable modules
- Redundancy with backup controls for critical systems, including manual overrides
- Enhanced security, including isolated networks and multi-factor authentication
- Integration with Nomad Portal™ for supercharged CMOC management (see below)

NOMAD PORTAL™ // THE NTC SUPERCHARGER

Nomad Portal is the revolutionary, cloud-based CMOC control system that integrates seamlessly with NTC. Purpose-built for the demands of mission-critical CMOCs, Portal goes beyond off-the-shelf fleet management solutions.

- Track the location, status, and sensor readings of connected assets
- Operate key systems remotely for improved safety and efficiency
- See aggregated, location-based weather, news, and social media feeds
- Get customizable reports and an integrated work order builder
