

U.S. CUSTOMS AND BORDER PROTECTION (CBP)

MOBILE COMMAND AND PROCESSING TRAILER

MISSION // The U.S. Customs and Border Protection (CBP) Office of Field Operations oversees comprehensive border management and control to protect U.S. national interests. CBP required specialized mobile platforms to serve as combination command and field processing centers for forward operations in its busiest border crossing areas.

SOLUTION // Nomad GCS designed, manufactured, and integrated two mobile command and processing centers for CBP. Built on Nomad Gooseneck Chassis with automatic leveling, each unit features flat-floor slideouts, separate conference and processing areas, and the Nomad Total Command™ (NTC) automation system. Equipped with a data connectivity package, galley, 360-degree camera system, and 12kW generator, these units enhance CBP's capabilities for border management at high-traffic entry points.

FEATURES //

- Nomad Gooseneck Chassis
- Automatic Leveling System
