

DEFENSE LOGISTICS AGENCY

MOBILE COMMAND TRAILER

MISSION // The Defense Logistics Agency (DLA) operated a mobile command platform that was nearing the end of its service life, and sought a replacement solution equipped with contemporary information technology and equipment. DLA's requirements were shaped by the need to support Department of Defense logistics with mobile communication and information systems.

SOLUTION // Nomad GCS designed and manufactured this custom 42-foot, three-axle Mobile Command Trailer. The platform supports efficient field work with two flat-floor slideouts that provide ample workspace, eight workstations, a conference area with table and additional couch seating, a full galley, and rooftop HVAC units. A 37U electronics rack, 25-foot mast, 12kW generator, hydraulic leveling legs, and a roof access ladder with work platform further enable field operations.

FEATURES //

- Custom 42' 3-Axle Trailer Chassis
- Hydraulic Leveling Legs Can Double as Landing Gear
- Two Flat-Floor Slideouts
- 8 Workstations and 8-Person Conference Table
- Couch Seating around Conference Area
- Galley with Refrigerator, Microwave, and Coffeemaker
- 37U Electronics Rack
- 25' Mechanical Mast
- Cummins Onan 12kW Generator
- Rooftop HVAC Units
- Roof Access Ladder with Work Platform
