

U.S. AIR FORCE

CRASHED, DAMAGED, DISABLED AIRCRAFT RECOVERY (CDDAR) RESPONSE TRAILER

MISSION // The U.S. Air Force required a mobile solution for responding to crashed, damaged, or disabled aircraft incidents on or off airfield property. Response needs dictated a durable trailer with a climate-controlled work area, mobile power, and secure storage for power tools and other equipment.

SOLUTION // Nomad GCS designed and manufactured this custom 26' bumper-pull aluminum trailer on dual 7,000-pound rated axles. The purpose-built body features a climate-controlled shelter, secure tool storage, custom cabinetry, and stainless metal work surfaces. Additional features include an 8kW Cummins Onan generator with 34-gallon fuel tank, LED lighting, and automatic full-length awning, ensuring reliable mobile performance.

FEATURES //

- Custom 26' Bumper-Pull Aluminum Trailer
- Dual 7,000# Capacity Axles
- Climate-Controlled Shelter with Side Door and Rear Ramp
- Custom Cabinetry and Metal Work Surfaces
- Tool Storage Compartments with Roll-Up Doors
- Interior and Exterior LED Lighting
- Roof Access Ladder
- Automatic Full-Length Exterior Awning
- Cummins Onan 8kW Generator
- Integrated 34 Gallon Fuel Tank
