

FEDERAL LAW ENFORCEMENT AGENCY

MOBILE COMMAND CENTER

MISSION // This Federal law enforcement agency tasks its watch group with 24x7x365 situational awareness. The watch group tracks operational capabilities, significant events, and emergency responses. This ensures the agency is able to address a situation, whether it's a natural disaster, national emergency, or national security effort. Required was a Mobile Command Center that was agile, reliable, and capable of full interoperability with other agencies.

SOLUTION // Nomad GCS engineered, manufactured, and integrated this Connected Mobile Operations Center (CMOC) on a Kenworth T680 chassis. Featuring Nomad Total Command™ automation, automatic leveling, and four slideouts, the vehicle enhances operational capacity in austere environments. An advanced communications suite, situational awareness cameras, dual masts, and an AvL 1.2m satellite antenna ensures reliable connectivity, seamless collaboration, and effective response and security missions.

FEATURES //

- Kenworth T680 Chassis
- Nomad Total Command™ (NTC) Asset Automation + Control
