

# FEDERAL LAW ENFORCEMENT AGENCY

## TACTICAL COMMAND VEHICLE

**MISSION //** This Federal law enforcement agency protects and safeguards the occupants, visitors, and infrastructure of the Pentagon and other Department of Defense facilities within the National Capitol Region. It required a mobile platform to respond quickly to incidents and provide robust communications capabilities for continuous operations on scene.

**SOLUTION //** Nomad GCS designed, manufactured, and integrated this TCV-MAX to provide a full suite of networking and connectivity tools during operations, including Nomad's proprietary AlwaysUp™ connectivity solution, a satellite data package, and a mesh network node. NIST-compliant Nomad Total Command™ (NTC) provides simple and rapid deployment and intuitive systems control. Multiple camera systems provide full visibility of an incident for three operator workstations. Imagery and other data can be easily briefed to responding officers via an exterior workstation with 46" LCD touchscreen monitor.

### FEATURES //
