

# BUMPER-PULL TRAILERS

- + Compact form factors from 16' to 28' in length
- + Compatible with common full-size tow vehicles
- + Deploys easily by anyone, with minimal training
- + Many configurations and technology options
- + Serves on its own or in conjunction with larger command assets

## LARGE PLATFORM CAPABILITIES, SMALL PLATFORM AGILITY

Size matters in incident response, but so does agility. Large Connected Mobile Operations Centers (CMOCs) are essential in many scenarios, but compact, easy-to-deploy platforms often complete or even lead the operational charge. That's where Nomad's Dispatch platform comes in: bumper-pull trailers packed with critical capabilities for rapid mobility and setup.

Towable by most full-sized vehicles with Class I to V hitches, Dispatch units deliver essential command functionality without the bulk. Available in lengths from 16 to 28 feet, with flexible axle and hitch options, they offer customizable layouts tailored to your mission. Inside, you'll find the latest Nomad technologies, including AlwaysUp™ connectivity and NeverDown™ power management, all controlled by advanced Nomad Total Command™ (NTC) automation.

**Get into action faster, with high mobility and true one-person operation.**

Transporting by aircraft? Dispatch trailers can be ATTLA Certified. Contact us.
