

# DEPARTMENT OF VETERANS AFFAIRS

## VA EMERGENCY PHARMACY TRAILER

**MISSION //** The Department of Veterans Affairs (VA) Emergency Pharmacy Service provides mobile pharmacy services for veterans, VA staff, and civilians during major emergencies. Mobile Pharmacy units are strategically placed around the country, ready for deployment if needed in support of VA emergency operations.

**SOLUTION //** Nomad GCS designed and manufactured four Emergency Pharmacy Service semitrailers. The pharmacy section includes two exterior walk-up customer service windows. A staff work area has medication storage and prescription fulfillment workstations. Designed for extended deployments, the trailers include staff quarters with a lounge, sleeping area, and bathroom. Floor space is maximized with two 20' slideouts. A satellite data package connects the trailers to the VA pharmacy network for patient records access, and a 35kW generator supplies HVAC and pharmacy electrical needs if shore power is unavailable. Staff safety is provided by ballistic protection in the walls and a scene surveillance system.

### FEATURES //

- 53' Semitrailer with Two 20' Slideouts
- Automatic Leveling
- Ballistic Protection in Walls + Floor
- Satellite Data Package
- Full Pharmacy Area
- Staff Quarters with Lounge and Sleeping Areas
- Galley and Bathroom
