

ENVIRONMENTAL PROTECTION AGENCY

MOBILE COMMAND POST

MISSION // The Environmental Protection Agency (EPA) is an independent agency of the U.S. Federal Government tasked with environmental assessments, research, and education. Responsible for enforcing national environmental standards, the EPA mission includes emergency deployments to spills, leaks, and other environmental hazards. An easy-to-operate mobile command center supports this mandate.

SOLUTION // Nomad GCS designed, manufactured, and integrated this mobile command post for EPA Region 10 emergency responders. Featuring a custom, compact platform that does not require a commercial driver's license for operation, this solution incorporates two full slideouts for maximum floor space to meet the EPA's requirement for six workstations and a galley. A weathertight exterior door accesses the inside electronics equipment rack for servicing. A cassette slide-out mounts the under-chassis generator while maintaining a compact vehicle profile.

FEATURES //

- Freightliner M2-106 Chassis
- 4x4 with Two-Speed Transfer Case
- Automatic Tire Chain System
- Custom Shelter with Two Slideouts
- Six Operator Workstations
- Galley with Microwave, Refrigerator, and Coffeemaker
