

MOBILE COMMAND VEHICLES

- + Available in shelter lengths from 12' to 36'
- + Numerous floor plan and slideout options
- + Two and four door chassis available from all major manufacturers
- + Many configurations and technology options
- + Deploys easily by anyone, with minimal training

THE CAPABLE, CUSTOMIZABLE, CONNECTED COMMAND PLATFORM

When your mobile operations demand maximum performance, Nomad's Incident Command (IC) platform delivers. These Connected Mobile Operations Centers (CMOCs) bring full command and control functionality to the field with advanced technology, expansive workspace, and single-operator deployment.

Built on full-size commercial and truck chassis from top manufacturers, IC platforms are tailored to your specs: two or four doors, gas or diesel engines, four-wheel drive, and shelter lengths from 12 to 36 feet are just a few options. Add flat-floor slideouts to create hundreds of square feet of configurable interior space.

Available technologies include AlwaysUp™ connectivity, NeverDown™ power, and Nomad Total Command™ (NTC) automation. Whatever the mission or environment, the IC platform delivers mobility, control, and confidence in the field.

Support any operation with robust capabilities.

Transporting by aircraft? Many CMOCs can be ATTLA Certified. Contact us.
