

MUSCOGEE (CREEK) NATION

MOBILE INCIDENT COMMAND TRAILER

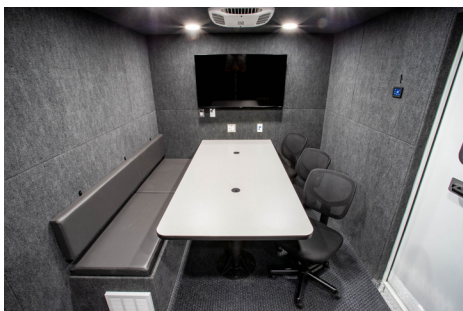

MISSION // Informed by lessons learned from the COVID pandemic, the Muscogee (Creek) Nation developed requirements for a Mobile Incident Command Trailer to support public health incident response throughout the tribal nation.

SOLUTION // Nomad GCS designed, manufactured, and integrated this purpose-built 24' aluminum Mobile Incident Command Trailer. A climate-controlled, two-room design ensures spacious and comfortable operations in any environment. Advanced communications are provided with a wireless connectivity package and JPS ACU-5000 radio interoperability system, while Nomad Total Command™ (NTC) automation optimizes performance. A 12kW generator, LED lighting, galley amenities, and exterior awning enhance functionality and mission readiness.
