

BADGER INFRASTRUCTURE SOLUTIONS LTD.

EMERGENCY RESPONSE COMMAND CENTER

MISSION // Badger Infrastructure Solutions Ltd. responds throughout North America to utility emergencies involving underground infrastructure. Badger manages its operations with an on-scene team, requiring a dedicated Emergency Response Command Center for highly responsive disaster mitigation and recovery.

SOLUTION // Nomad GCS designed, manufactured, and integrated this 32-foot custom Emergency Response Command Center built on a Peterbilt 348 chassis. The platform features three flat-floor slideouts to accommodate a conference table, multiple workstations, and a galley area. An exterior briefing monitor under an awning enables larger work groups. AlwaysUp™ connectivity with satellite data supports continuous and redundant communications. Nomad Total Command™ (NTC) asset automation oversees data services as well as the automatic leveling system, 20kW generator, and HVAC systems for easy setup and operation.
